Thanks for 8Uÿ

IAAB™ MON

Progressive type.

IAAB™ MON

IAAB™ mono is a progressive font inspired by the industrial revolution. The development of the font included an investigation about Conceptualism, Monograms, industrial morphology, machinery and ideogram symbols. The objective was to create an alphabet in which functionalities coexist in each glyph at the service of the composition of abstractions, words, and texts. IAAB™ is a 1 pitch variable font with 4 levels of glyphs. IAAB™ contains a personality defined mainly by the conceptual morphology of its glyphs and by the coexistence of the system at the service of abstraction and conceptualization of content.

IAAB™

IAAB™.
